Publication Analytics

Microsoft Academic gathers publications from across the web and partnered sources and these are the heart of our graph. Data from these publications is extracted to generate and inform other entities in the graph (like Authors for instance). Publications can be claimed by Microsoft Academic users to build a profile and improve the quality of the graph as well.

You can run your own complex academic analytics using our data. Please contact us through the Feedback form below to learn about getting access to the [Microsoft Academic Graph](#).

230,107,720  
Total Number of Publications

2,126,413,202  
Total number of estimated citation pairs
