

Mathematical Reviews[®] (MathSciNet[®])

Since 1940, Mathematical Reviews[®] (MR) has served researchers and scholars in the mathematical sciences by providing timely information on peer-reviewed articles and books. **MathSciNet[®]**, the electronic version of MR, presents a fully searchable database with many tools designed to help navigate the mathematical sciences literature, including:

- reviews written by a community of experts
- bibliographic listings dating back to the early 1800s
- links to articles, journals, and publishers
- linked reference lists
- citation information on articles, books, and journals

The History of Mathematical Reviews

January 2015 marked the 75th anniversary of the first issue of Mathematical Reviews. Take a look at this page about The History of Mathematical Reviews for an inside look at MR's development from conception to today.

For Librarians

Find information about journals and serials covered by MR, learn more about MathSciNet®, and discover a collection of resources available from the AMS in support of librarian activities.

Mathematics Subject Classification

Search the Mathematics Subject Classification (MSC) scheme. This scheme, developed by the two reviewing databases, Mathematical Reviews® and Zentralblatt MATH, is used by them to classify book and article listings.
