Robots Database

The Robots Database lists robot software implementations and operators.

Robots listed here have been submitted by their owners, or by web site owners who have been visited by the robots. A listing here does not mean that a robot is endorsed in any way.

For a list of User-Agents (including bots) in the wild, see www.botsvsbrowsers.com

This robots database is currently undergoing re-engineering. Due to poular demand we have restored the existing data, but addition/modification are disabled.
