Project Academic Knowledge

Overview

< Back to Cognitive Research Technologies main page

Microsoft

Tap into the wealth of academic content in the Microsoft Academic Graph using the Academic Knowledge API:

Interpret

Interprets a natural language user query string. Returns annotated interpretations to enable rich search-box auto-completion experiences that anticipate what the user is typing.

Evaluate

Evaluates a query expression and returns Academic Knowledge entity results.

Calchistogram

Calculates a histogram of the distribution of attribute values for the academic entities returned by a query expression, such as the distribution of citations by year for a given author.

Similarity

Calculates the academic cosine similarity between 2 text inputs. Assesses the similarity of not only words but concepts of the related texts.

Cognitive Research Technologies: Terms of Use | Stack Overflow
